

AZD9291 Versus Gefitinib or Erlotinib in Patients With Locally Advanced or Metastatic Non-small Cell Lung Cancer

Clinical trial evidence card

Document ID: TRIAL-NCT02296125

Category: clinical_trials

Source entity: 02_clinical_trials/TRIAL-NCT02296125.json

Trial Identity

Trial ID: NCT02296125

Acronym: FLAURA

Brief title: AZD9291 Versus Gefitinib or Erlotinib in Patients With Locally Advanced or Metastatic Non-small Cell Lung Cancer

Overall status: COMPLETED

Lead sponsor: AstraZeneca

Collaborators: Parexel

Design And Outcomes

Phases: PHASE3

Enrollment: {"count": 674, "type": "ACTUAL"}

Conditions: Locally Advanced or Metastatic EGFR Sensitising Mutation Positive Non Small Cell Lung Cancer

Interventions: AZD9291 80 mg/40 mg + placebo; Placebo Erlotinib 150/100mg; Placebo Gefitinib 250 mg; Erlotinib 150/100 mg; Gefitinib 250 mg; Placebo AZD9291 80 mg/ 40 mg

Primary outcomes: Median Progression Free Survival (PFS) (Months); Percentage of Participants in Progression Free Survival at 6, 12, and 18 Months

Has results: True
