

A Study of Osimertinib With or Without Chemotherapy as 1st Line Treatment in Patients With Mutated Epidermal Growth Factor Receptor Non-Small Cell Lung Cancer (FLAURA2)

=====
Clinical trial evidence card

Document ID: TRIAL-NCT04035486

Category: clinical_trials

Source entity: 02_clinical_trials/TRIAL-NCT04035486.json

Trial Identity

Trial ID: NCT04035486

Acronym: FLAURA2

Brief title: A Study of Osimertinib With or Without Chemotherapy as 1st Line Treatment in Patients With Mutated Epidermal Growth Factor Receptor Non-Small Cell Lung Cancer (FLAURA2)

Overall status: ACTIVE_NOT_RECRUITING

Lead sponsor: AstraZeneca

Collaborators:

Design And Outcomes

Phases: PHASE3

Enrollment: {"count": 587, "type": "ACTUAL"}

Conditions: Non-Small Cell Lung Cancer

Interventions: Osimertinib; Pemetrexed/Carboplatin; Pemetrexed/Cisplatin

Primary outcomes: Adverse Events Graded by Common Terminology Criteria for Adverse Event v5 (Safety Run-In Treatment Arms Only); Progression-free Survival (PFS) (Randomized Component); Sensitivity Analysis for Progression-free Survival (PFS) by Blinded Independent Central Review (BICR) Assessment (Randomized Component)

Has results: True
