

AZD9291 (Osimertinib) Versus Platinum-Based Doublet-Chemotherapy in Locally Advanced or Metastatic Non-Small Cell Lung Cancer

=====
Clinical trial evidence card

Document ID: TRIAL-NCT02151981

Category: clinical_trials

Source entity: 02_clinical_trials/TRIAL-NCT02151981.json

Trial Identity

Trial ID: NCT02151981

Acronym: AURA3

Brief title: AZD9291 (Osimertinib) Versus Platinum-Based Doublet-Chemotherapy in Locally Advanced or Metastatic Non-Small Cell Lung Cancer

Overall status: COMPLETED

Lead sponsor: AstraZeneca

Collaborators:

Design And Outcomes

Phases: PHASE3

Enrollment: {"count": 421, "type": "ACTUAL"}

Conditions: Anticancer Treatment

Interventions: Chemotherapy; Cross-over to Osimertinib

Primary outcomes: Progression Free Survival (PFS) by Investigator Assessment

Has results: True

Public Documents

Documents: Prot_000.pdf; SAP_001.pdf

Provenance

Provenance: derived_from_raw_layer

Privacy posture: aggregate clinical trial registration/results only
